

## OPERATOR SAFETY TRAINING & TRAIN THE TRAINER CLASSES

### BENEFITS OF DARR EQUIPMENT SAFETY TRAINING:

- Our trainer can come to your operation or you can come to one of the multiple locations throughout Texas and Oklahoma.
- Training at your facility and on your machine minimizes employee time away from the job.
- Reduces the risk of accidents and injuries thereby potentially reducing your operating costs and improving your safety record.
- Our trainers are certified by the manufacturer to perform site-specific and machine-specific training.
- Our Operator Training Program will assist you in complying with Federal Occupational Safety and Health Administration (OSHA) training regulations under the OSHA Mandate for Powered Industrial Trucks.

### OPERATOR SAFETY TRAINING CLASSES

- Sit-Down Counterbalanced (Class I, IV, V).
- Warehouse Products (Class II, III)
- Combilift and Princeton Piggyback

Each class complies with OSHA Mandate 29CFR 1910.78 for Powered Industrial Trucks. An OSHA compliant training program consists of the following:

1. Classroom Training  
Including lecture, video and exam.
2. Practical Training  
“Hands-on” portion of the training
3. Operator Evaluations

Note: Certifications are good for 3yrs

- Train The Trainer
